

Question No-5:

//Program to check whether a number is positive or negative

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    int no;
```

```
    no=0;
```

```
    printf("Enter a Number :");
```

```
    scanf("%d",&no);
```

```
    if(no>0)
```

```
        printf("%d is positive number ",no);
```

```
    else if(no=0)
```

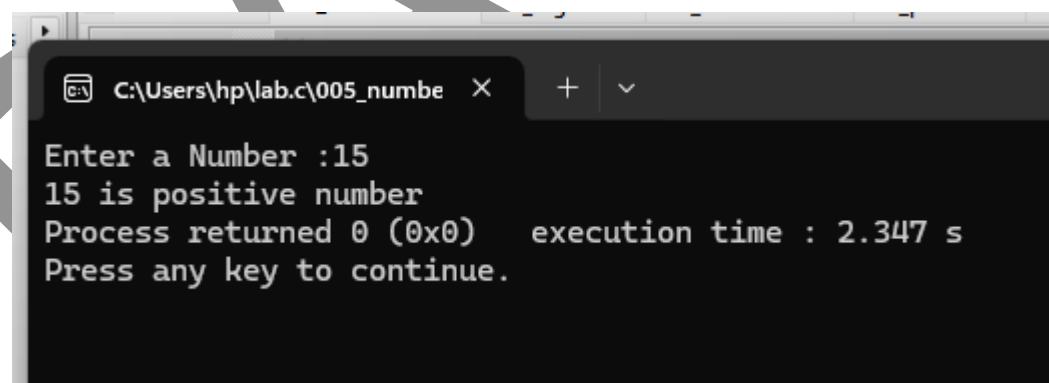

```
        printf("%d is neutral number",no);
```

```
    else
```

```
        printf("%d is negative number",no);
```

```
    return 0;
```

```
}
```

```
C:\Users\hp\lab.c\005_numbe X + v
Enter a Number :15
15 is positive number
Process returned 0 (0x0) execution time : 2.347 s
Press any key to continue.
```
