

Question No-08:

//Program to convert days into months,weeks and years

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    int d,td,m,yr,w;
```

```
    d=td=m=yr=w=0;
```

```
    printf("Enter no of days :");
```

```
    scanf("%d",&td);
```

```
    yr=td/365;
```

```
    m=(td%365)/30;
```

```
    w=(td%365)%30/7;
```

```
    d=(td%365)%30%7;
```

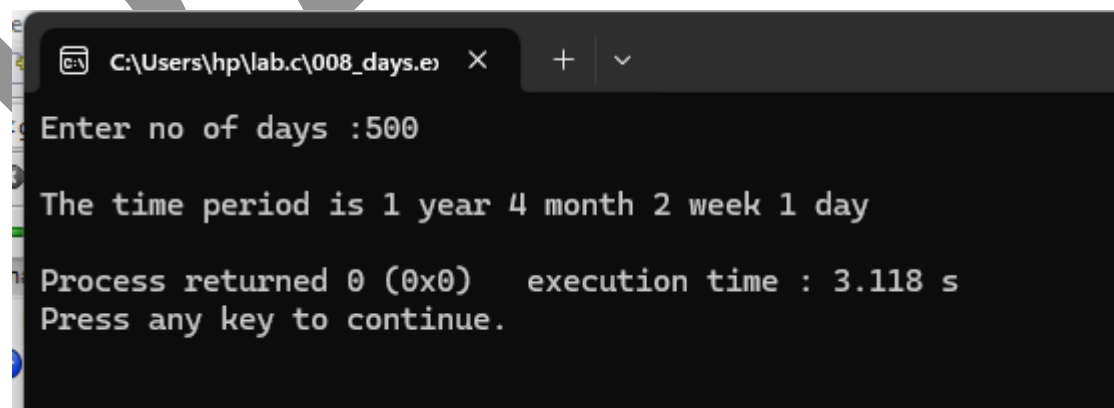

```
    printf("\nThe time period is %d year %d month %d week %d day",yr,m,w,d);
```

```
    printf("\n");
```

```
    getch();
```

```
    return 0;
```

```
}
```

```
C:\Users\hp\lab.c\008_days.e X + v
Enter no of days :500
The time period is 1 year 4 month 2 week 1 day
Process returned 0 (0x0)   execution time : 3.118 s
Press any key to continue.
```
