

## Question No-10:

//Program to read characters and display in a reverse order

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    char ch1,ch2,ch3;
```

```
    printf("Enter a character :");
```

```
    scanf("%c",&ch1);
```

```
    printf("Enter a character :");
```

```
    fflush(stdin);
```

```
    scanf("%c",&ch2);
```

```
    printf("Enter a character :");
```

```
    fflush(stdin);
```

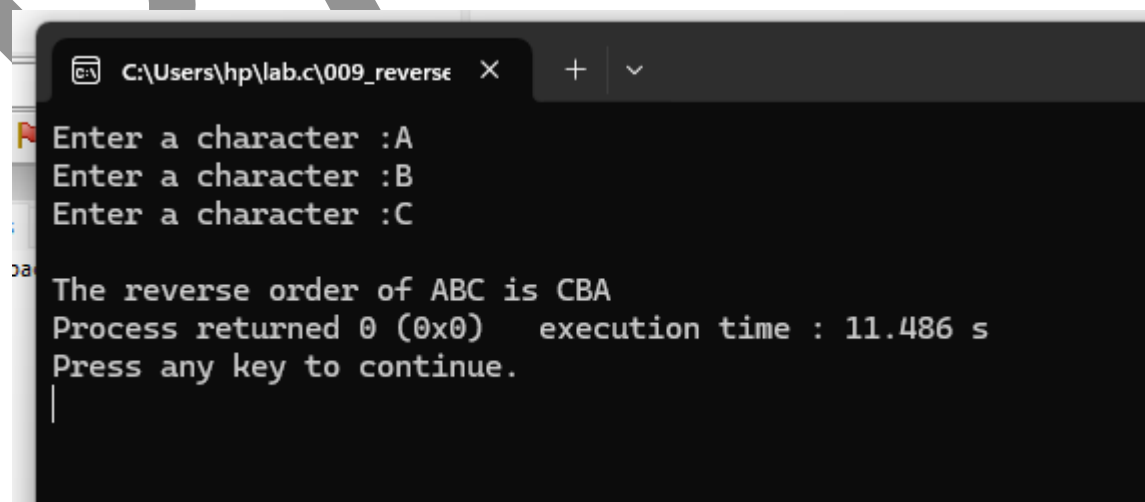

```
    scanf("%c",&ch3);
```

```
    printf("\nThe reverse order of %c%c%c is %c%c%c\n",ch1,ch2,ch3,ch3,ch2,ch1);
```

```
    getch();
```

```
    return 0;
```

```
}
```

```
C:\Users\hp\lab.c\009_reverse X + v
Enter a character :A
Enter a character :B
Enter a character :C

The reverse order of ABC is CBA
Process returned 0 (0x0) execution time : 11.486 s
Press any key to continue.
