

Question No-20:

//PROGRAM TO CONVERT KILOMETERS INTO METERS

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    float km,m;
```

```
    km=m=0;
```

```
    printf("enter the distance in kilometer :");
```

```
    scanf("%f",&km);
```

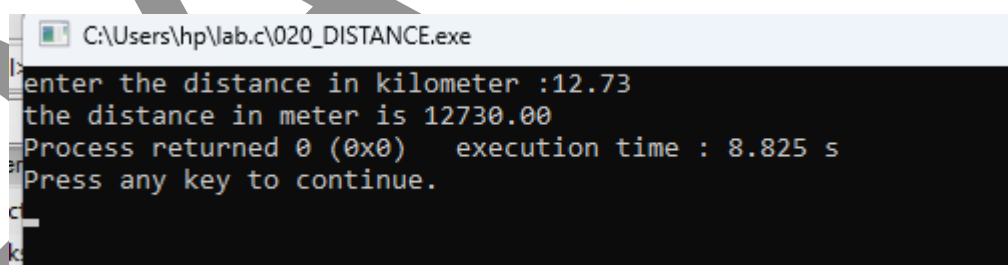

```
    m=1000*km;
```

```
    printf("the distance in meter is %.2f",m);
```

```
    getch();
```

```
    return 0;
```

```
}
```

```
C:\Users\hp\lab.c\020_DISTANCE.exe
enter the distance in kilometer :12.73
the distance in meter is 12730.00
Process returned 0 (0x0)   execution time : 8.825 s
Press any key to continue.
```
