

Question No-12:

//Program to convert Upper case letters into Lower case letters

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    char inletter,outletter;
```

```
    printf("Enter a letter :");
```

```
    scanf("%c",&inletter);
```

```
    printf("The ASCII code for the inputted letter is %d\n",inletter);
```

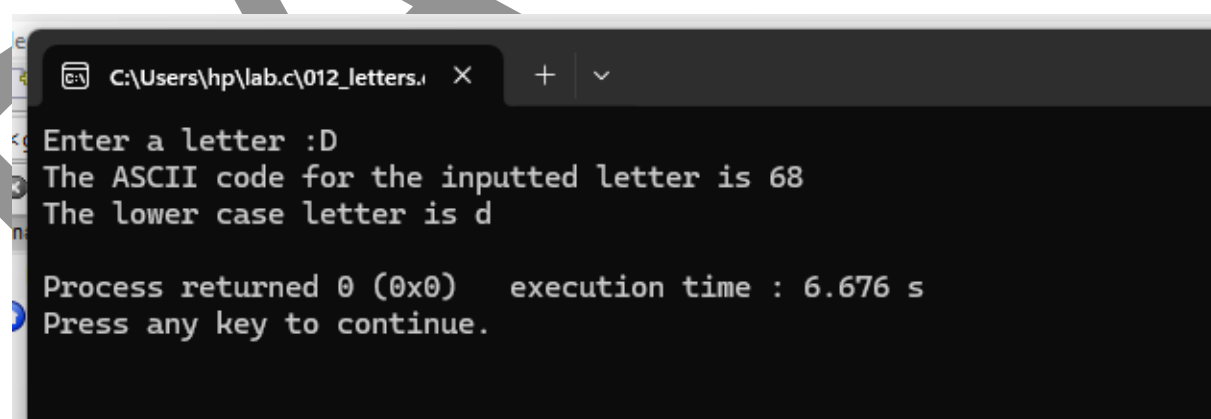

```
    outletter=inletter+32;
```

```
    printf("The lower case letter is %c\n",outletter);
```

```
    getch();
```

```
    return 0;
```

```
}
```

```
C:\Users\hp\lab.c\012_letters. X + v
Enter a letter :D
The ASCII code for the inputted letter is 68
The lower case letter is d

Process returned 0 (0x0)   execution time : 6.676 s
Press any key to continue.
```
