

## Question No-25:

//program to add two characters and display the ascii codes

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    int no1,no2,t;
```

```
    printf("Enter a Number (0-127):");
```

```
    scanf("%d",&no1);
```

```
        printf("Enter a Number (0-127):");
```

```
        fflush(stdin);
```

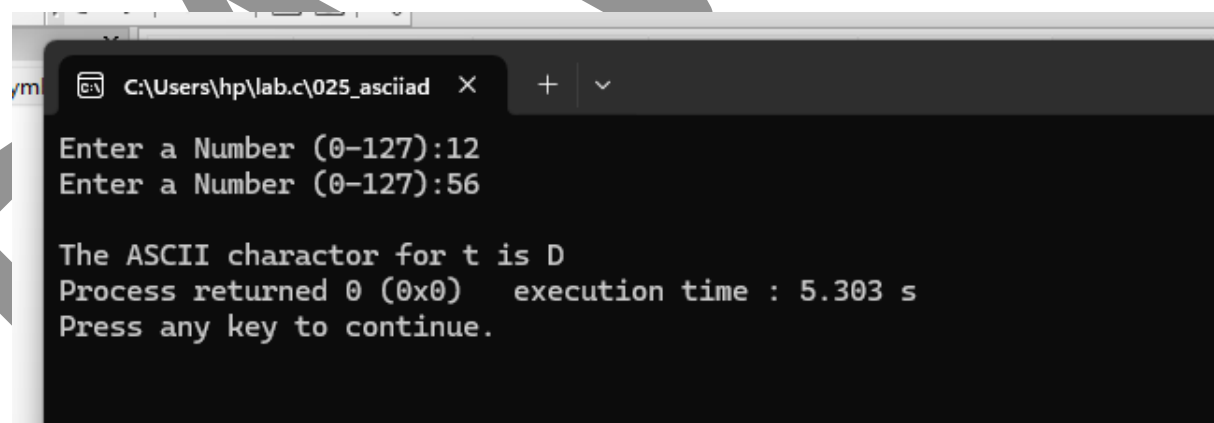

```
    scanf("%d",&no2);
```

```
    t=no1+no2;
```

```
    printf("\nThe ASCII charactor for t is %c",t);
```

```
    return 0;
```

```
}
```

```
C:\Users\hp\lab.c\025_asciiad X + v
Enter a Number (0-127):12
Enter a Number (0-127):56

The ASCII charactor for t is D
Process returned 0 (0x0)   execution time : 5.303 s
Press any key to continue.
```
