

Question No-40:

//Program to read grade and declare the description

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    char ch;
```

```
    printf("Enter your grade from (E/V/G/A/F):");
```

```
    scanf("%c",&ch);
```

```
    switch(ch)
```

```
    {
```

```
        case 'e':
```

```
        case 'E':printf("Excellent");break;
```

```
        case 'v':
```

```
        case 'V':printf("Very Good");break;
```

```
        case 'g':
```

```
        case 'G':printf("Good");break;
```

```
        case 'a':
```

```
        case 'A':printf("Average");break;
```

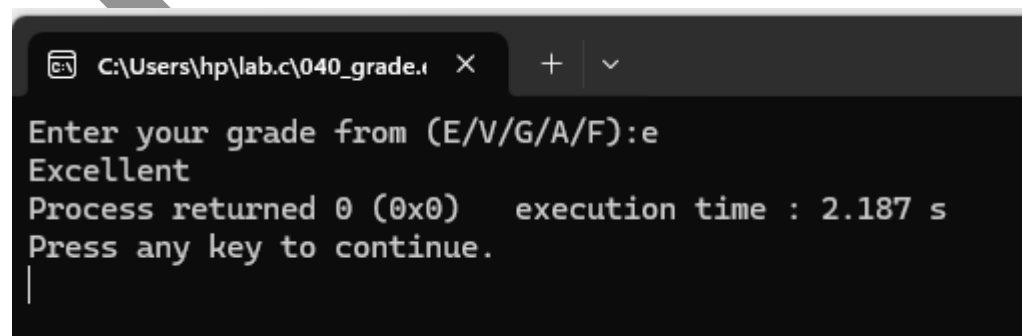

```
        case 'f':
```

```
        case 'F':printf("Fail");break;
```

```
        default:printf("Invalid Input...");
```

```
    }
```

```
    return 0;}
```

```
C:\Users\hp\lab.c\040_grade.c x + v
Enter your grade from (E/V/G/A/F):e
Excellent
Process returned 0 (0x0)   execution time : 2.187 s
Press any key to continue.
