Question No-25:

```
//Program to check whether a person is eligible for bonus
#include<stdio.h>
int main()
{
       char ms,gn;
       int age;
        age=0;
        printf("Enter your Age:");
       scanf("%d",&age);
        ms=toupper(ms);
        printf("Enter your Martial Status
(M)arried/(U)nmarried:");
                                                                                                                                              C:\Users\hp\lab.c\025_bonuse X
       fflush(stdin);
                                                                                                                                            Enter your Age:30
                                                                                                                                            Enter your Martial Status (M)arried/(U)nmarried:U
        scanf("%c",&ms);
                                                                                                                                            Enter your Gender(M/F) :M
                                                                                                                                            You are not eligible for bonus
        gn=toupper(gn);
