Question No-10:

//Program to read two numbers and print their absolute difference

```c
#include<stdio.h>
int main()
{
    int n1,n2,temp;
    n1=n2=temp=0;
    printf("Enter a Number :");
    scanf("%d",&n1);
    printf("Enter another Number :");
    scanf("%d",&n2);
    temp=n1-n2;
    if(temp>=0)
        printf("The absolute difference is %d",temp);
    else
        printf("The absolute difference is %d",temp*(-1));
    return 0;
}
```
