Question No-14:

```c
//PROGRAM TO CONVERT RUPEES INTO PAISE
#include<stdio.h>
int main()
{
    float rupees,paise;
    rupees=paise=0;
    printf("enter the amount in rupees : ");
    scanf("%f",&rupees);
    paise=100*rupees;
    printf("the money in paise is %.2f/-",paise);
    getch();
    return 0;

}
```

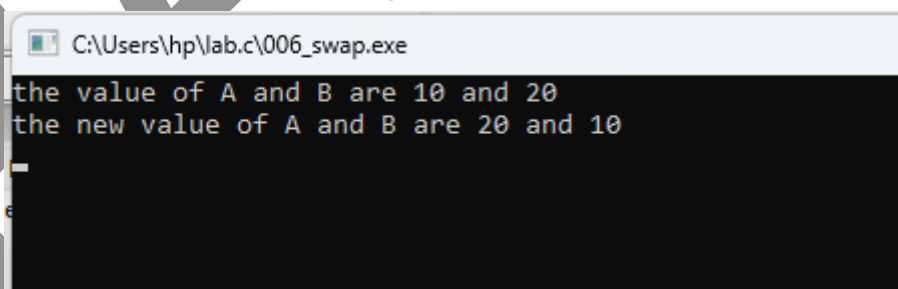

```
C:\Users\hp\lab.c\006_swap.exe
the value of A and B are 10 and 20
the new value of A and B are 20 and 10
```
