Question No-8:

//Program to check the costliest pen

#include<stdio.h>

int main()

{

  int Reynolds,Montex,Parker;

  Reynolds=Parker=Montex=0;

  printf("Enter the price of three pens :");

  scanf("%d%d%d",&Reynolds,&Montex,&Parker);

  if(Reynolds>Montex&&Reynolds>Parker)

   printf("Reynolds is most costliest");

  else

    if(Montex>Parker)

    printf("Montex is most costliest ");

  else

    printf("Parker is most costliest ");

  return 0;

}

```
Enter the price of three pens :560
520
1022
Parker is most costliest
Process returned 0 (0x0)    execution time : 10.060 s
Press any key to continue.
